Extreme Reversals

1-min and 5-min Look of Extreme Reversals

15-min New High

- **Stock Selection**
- Stock should be VERY extended from VWAP.
- Usually happens later morning, afternoon.

For going long:

- New 15 min high (must)
- Cross of the 50 MA on the 1-min with the 9 and 20 EMA
- A pullback to the 50 MA is preferable on 1-min
- New 5-min high

Bonuses:

- a) the bounce of a daily moving average or daily level
- b) Double bottom/top on larger time frames
- c) Reversal candles on the 5 or the 15 (Hammer, doji, shooting star etC)

Entry:

breaks above 50 MA on the 1 min or after bounce of 50 MA

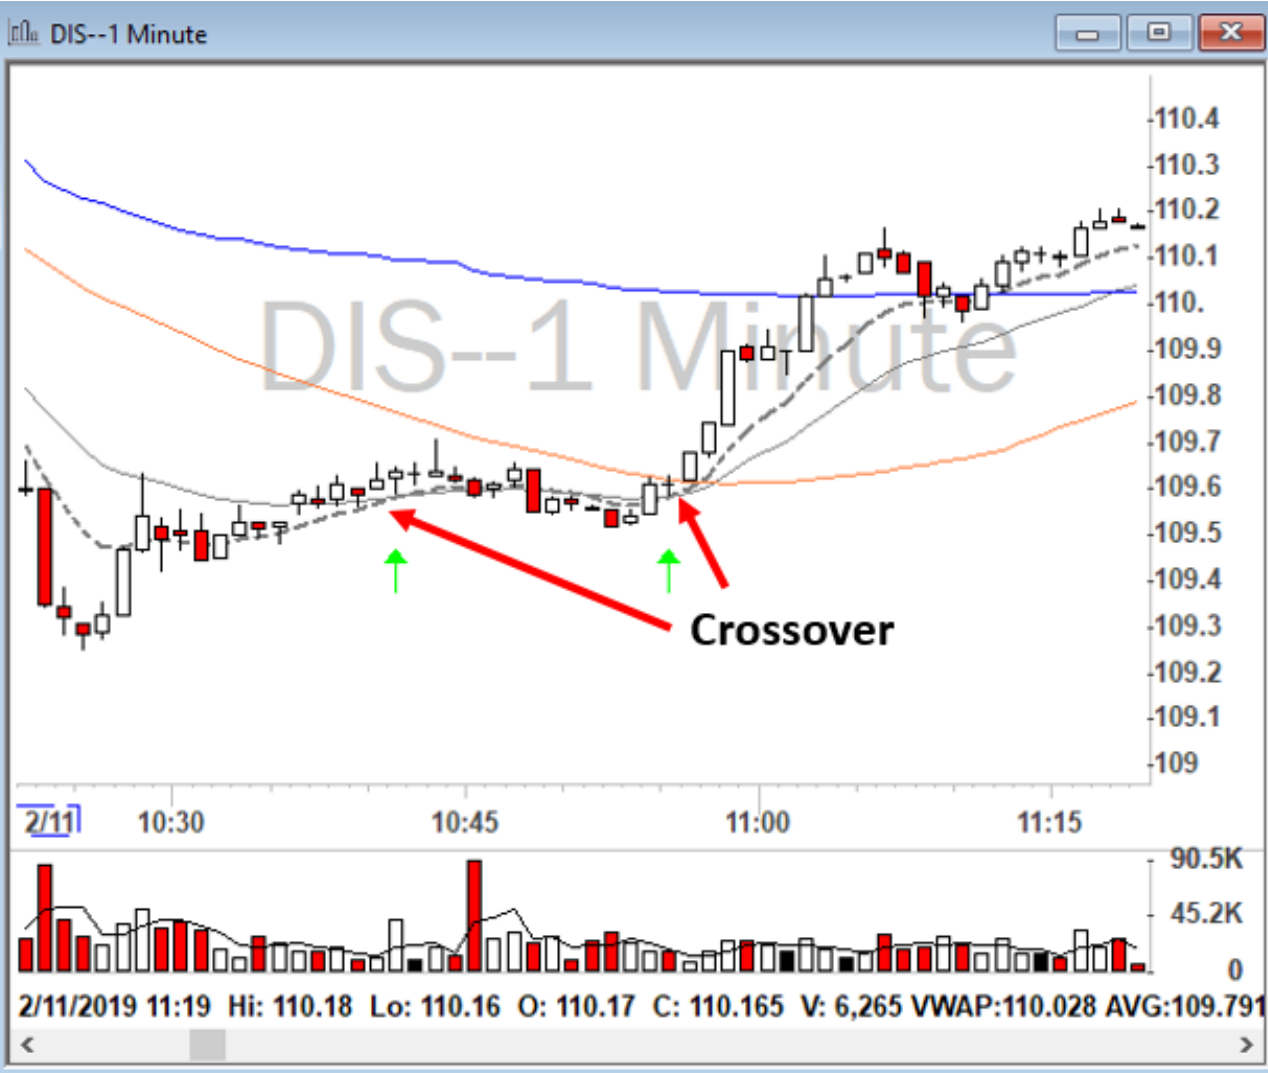

Stop loss:

High/low of day if taken right after break of the 50 MA on the 1-min, or the 50 MA if the entry is after the bounce of the 50 MA

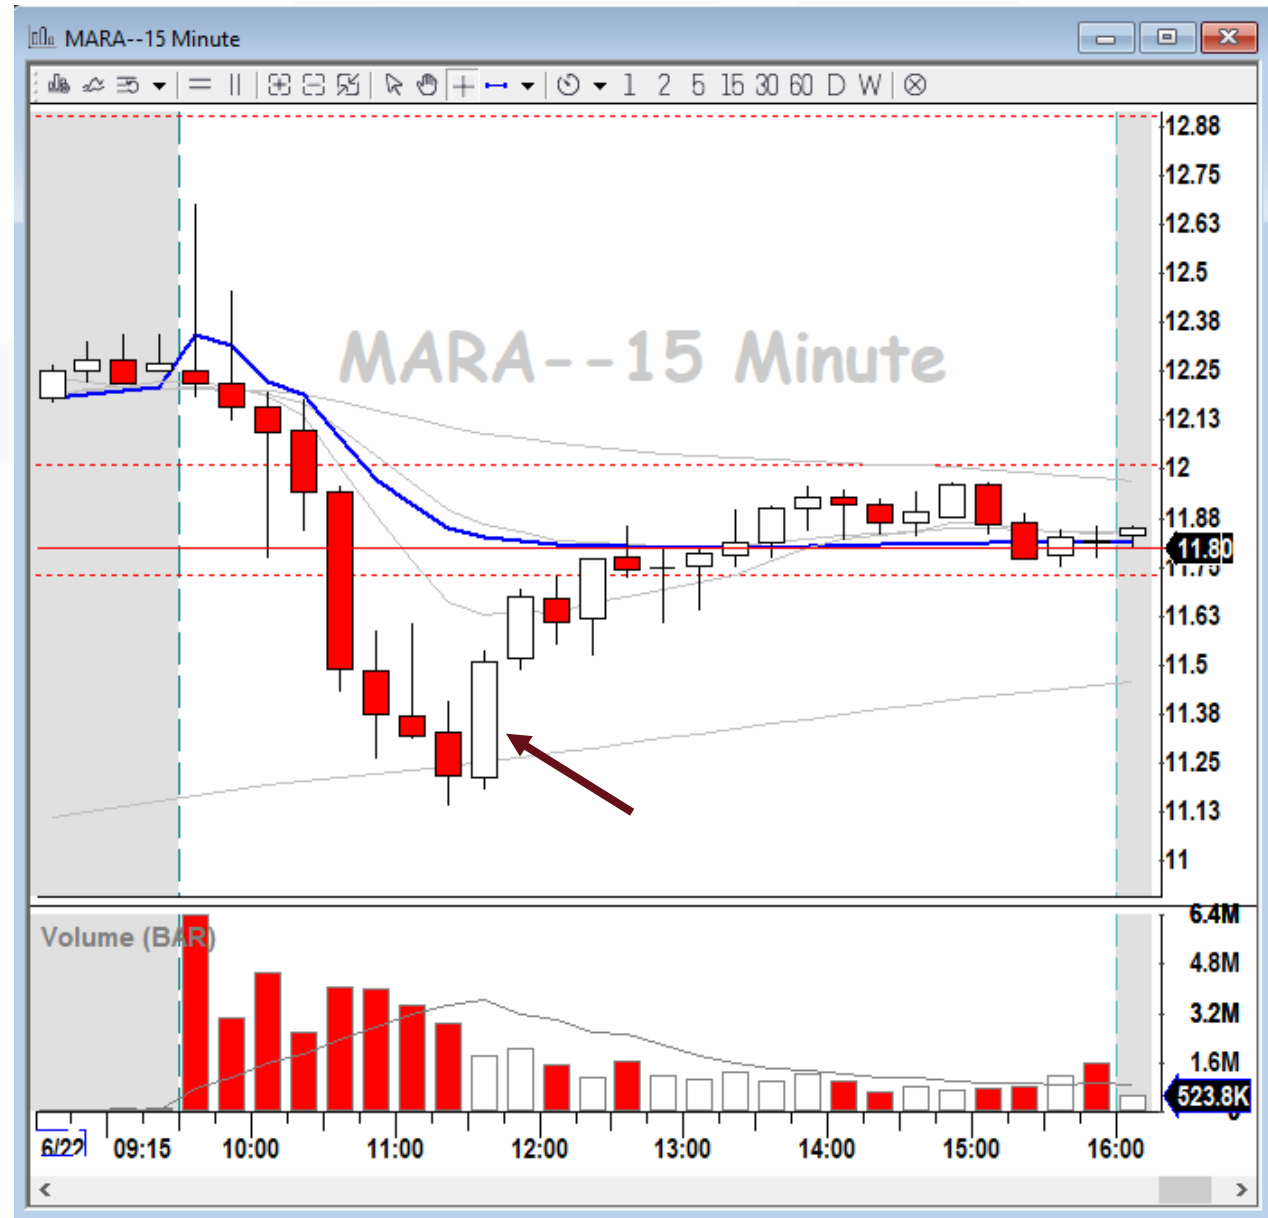

Target: Depending on style, preferable at least 2:1
